Takeaways from the Town Hall Meetings

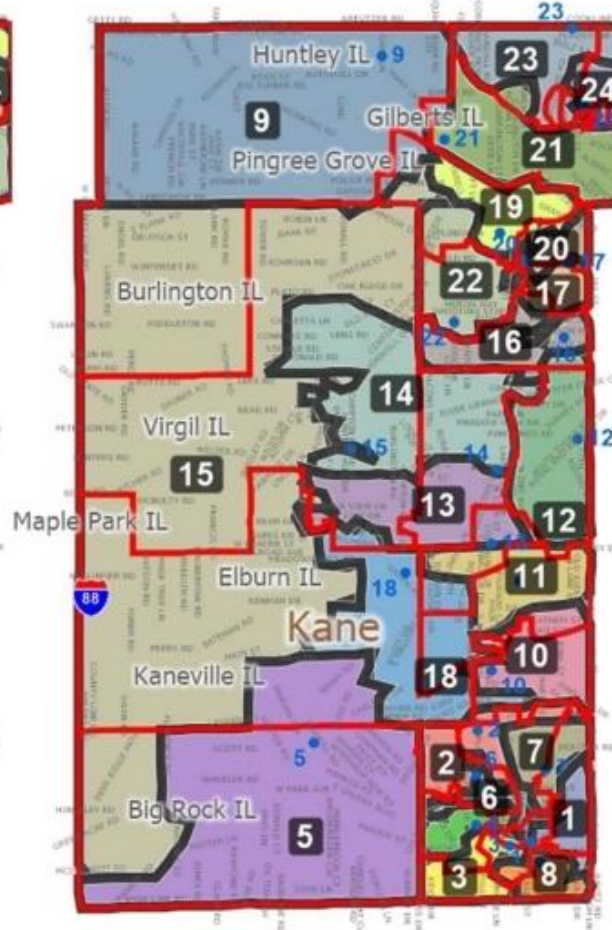

- Hispanic population in Northeast and Southeast must be addressed under the voting rights act (VRA)
- African-American representation and voters deserve consideration but do not have a concentration of population to create a district under VRA
- Why is the MALDEF map being presented?
- Why are we using ACS data?
- Contiguous districts with straight-line boundaries may or may not be possible based on VRA and population centers
- Keep municipalities and areas together avoid splitting
- Representation for the far western third of the county, rural residential and agriculture representation
- Distance or geographical area in western Kane presents a challenge when representative is too far away, 20-30 miles is too far.
- Why not wait for the Census Data?
- What is the process?
